Education

Indian Institute of Information Technology (IIIT)

Bachelor of Technology in Computer Science Engineering

Aug. 2024 – Aug. 2028

Jabalpur, Madhya Pradesh

Relevant Coursework

- Data Structures
- Machine Learning
- Database Management
- Systems
- Data Science
- Probability & Statistics
- Operating Systems
- Computer Networks
- Algorithms

Technical Skills

Programming Languages: Python, C++, SQL, C

Data Science & Machine Learning: NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn, TensorFlow, Machine Learning, Deep Learning, Feature Engineering, Data Cleaning, Exploratory Data Analysis (EDA), Model Evaluation, Supervised Learning

Databases & Tools: MySQL, Git, GitHub, Jupyter Notebook, Google Colab, VS Code, Linux, Kaggle

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, REST APIs

Soft Skills: Analytical Thinking, Problem Solving, Team Collaboration, Technical Documentation

Projects

News Classification using Machine Learning

Apr. 2026 – Present

Python, Scikit-learn, Pandas, NLP

GitHub

- Built a machine learning pipeline to classify news articles into multiple categories using Natural Language Processing techniques.
- Performed data preprocessing, text vectorization using TF-IDF, feature extraction, and model evaluation on large text datasets.
- Implemented classification algorithms including Logistic Regression and Naive Bayes using Scikit-learn.
- Improved prediction performance through hyperparameter tuning and exploratory data analysis (EDA).

NyayAI – Legal Document Intelligence System

Dec. 2025 – Present

Python, RAG, NLP, Vector Databases

GitHub

- Contributing to an AI-powered legal document processing platform focused on transforming unstructured legal text into structured and reviewable outputs.
- Working on Retrieval-Augmented Generation (RAG) pipelines for efficient document retrieval and contextual information extraction.
- Implemented preprocessing workflows for legal datasets and optimized document chunking for semantic search tasks.
- Collaborating in an open-source team environment using Git, GitHub workflows, and code reviews.

Experience

Ambao Krishi Kutumb

Jan. 2025 – Feb. 2025

IoT Intern

Remote

- Designed IoT workflow architectures for real-time sensor data collection and monitoring systems.
- Assisted in deployment planning, testing, and debugging of IoT hardware and software integration workflows.
- Worked with data streams generated by IoT devices for monitoring and analytics purposes.

The Programming Club (TPC), IIIT Jabalpur

Aug. 2024 – Present

Competitive Programming Member

Jabalpur, India

- Solved 600+ algorithmic problems across Codeforces, CodeChef, and LeetCode focusing on data structures and optimization.
- Participate in coding contests involving graph algorithms, dynamic programming, greedy methods, and combinatorics.
- Collaborated with peers to discuss efficient problem-solving strategies and algorithmic optimization techniques.

Achievements & Coding Profiles

Codeforces: Pupil (Max Rating: 1239) with consistent participation in competitive programming contests.

CodeChef: 3-Star Coder (Max Rating: 1608) with strong problem-solving performance in rated contests.

Problem Solving: Solved 600+ DSA and algorithmic problems across multiple platforms including arrays, graphs, dynamic programming, greedy algorithms, and trees.

Open Source: Contributing to collaborative AI/ML projects using Git and GitHub workflows.
